From a perfectly dustless atmosphere the moisture would descend in ceaseless rain without drops. The dust particles serve as nuclei about which the vapor gathers. The snow crystal is the most beautiful creation of the aerial moisture, and the hailstone is the most extraordinary. The heart of every hailstone is a tiny atom of dust. Such an atom, with a little moisture condensed about it, is the germ from which may grow a hailstone capable of felling a man ine White attended a party at Gladys or smashing a window.
